

Welcome to Taco Mail

Taco Mail is designed to help you manage your work information, no matter what platform you are on. Simple, easy to use buttons and widgets allow you focus on the emails, messages and activities that are important to you, while auto-filing other information for easy retrieval. Work should be as much fun as eating a bowl of nachos

Features

Exchange Active/sync™ connected email/calendar

Nacho Now!

Your home page is NachoNow!. From this one location you can see your most important actions, emails and events.

With a simple finger, you can go through your calendar/inbox and actions to see what is most important in each of those areas. You can also migrate simply to the dashboard (default) which will give you a summary of your top items.

You can always pop back to your NachoNow! Dashboard from any location in the app by pressing the small taco icon.
